Endoscopic Ultrasound Guided Staging of the Mediastinum

Heidelberg 19 – 20 July 2007

8th Interdisciplinary Training Course

Heidelberg 19 – 20 November 2007

9th Interdisciplinary Training Course

Copenhagen 25 – 26 January 2008

10th Interdisciplinary Training Course

INTRODUCTION

"The aim of our workshop is to present the indications for EUS-FNA, EBUS and EBUS-TBNA and to discuss their place in the diagnostic armamentarium. Some of the most experienced doctors in this field will be gathered at the workshop to demonstrate their skills, 'tips and tricks' during live video transmitted procedures.

The interpretation of the different ultrasound images may be difficult to learn and the ultrasound-guided procedures may be difficult to master before the procedures can be integrated in clinical practice."

Mark Krasnik, MD Felix Herth, MD, FCCP, DSc.

EUS-FNA Endoscopic UltraSound guided Fine Needle Aspiration is performed on a routine basis at many endoscopic centres. Since EUS is performed via the oesophagus traversing the posterior and inferior mediastinum the method of EUS-FNA has been proven valuable for staging evaluation of lung cancer as well as for primary diagnosis of unknown mediastinal lesions. EUS has hitherto been considered complementary to mediastinoscopy because of the limitations of EUS to reach the anterior mediastinum.

EBUS-TBNA Endo-Bronchial UltraSound guided Trans-Bronchial Needle Aspiration is a new minimal invasive method, which enables real-time US guided sampling of tissue from the anterior and posterior mediastinum and the hilar regions.

In addition to the mentioned biopsy methods, EndoBronchial UltraSound (EBUS) with mini-probes allows reliable evaluation of the depth of invasion of a lung cancer and the diagnosis of peripheral lesions.

FACULTY

Course Director

Felix Herth, MD, FCCP, DSc.
Dept. of Pulmonology
Thoraxklinik Heidelberg, Germany

Mark Krasnik, MD
Dept. of Thoracic and Cardiovascular Surgery
Gentofte University Hospital, Hellerup, Denmark

Invited Speaker

Jouke Annema*, MD
Dept. of Pulmonology
Leiden University Medical Center, The Netherlands

Thomas Beyer*, MD
Dept. of Pulmonology
Lungenklinik Ballenstedt, Germany

Ralf Eberhardt* **, MD
Dept. of Pulmonology
Thoraxklinik Heidelberg, Germany

Birgit Gulddammer Skov**, MD, DSc.
Dept. of Pathology
Gentofte University Hospital, Hellerup, Denmark

Peter Vilmann**, MD, DSc.
Dept. of Surgical Gastroenterology
Gentofte University Hospital, Hellerup, Denmark

* Heidelberg Course ** Copenhagen Course

PROGRAM

Day 1

Start 11:30 (Registration)

- Lectures: Staging Modalities Specimen handling
- Hands-on Workshop: Preparation
- Hands-on Workshop: Procedure

Evening Program

Day 2

Start 8:00

- Live Demo: 3 cases*
- Cyto-Pathologic Results
- Treatment Decisions / Discussion

End 13:00

* Heidelberg Course including 1 EBUS miniprobe case
