

ERS Course

Virtual school on interstitial lung diseases

18–19 March, 2021

This interactive online course will provide participants with a comprehensive overview of interstitial lung diseases (ILDs).

Join us online for:

- Updates on: diagnostic procedures in ILDs such as cryo-biopsy; current, future and novel therapies; COVID-19 and ILD.
- Practical guidance on which diagnostic procedures should be used in given clinical circumstances.
- Live, round-table discussions and ILD board discussions led by experts.
- The opportunity to present pre-recorded cases and discuss them with leading specialists.
- CME credits for your continued professional development.

IMPORTANT INFORMATION

- The virtual school will include interactive lectures, live discussion of pre-recorded procedures plus interactive chats and polling.
- There are a limited number of places available, so please register soon.
- Participants can submit case presentation videos to be included in the case-based sessions until 21 February, 2021.
